MANAGEMENT’S MESSAGE
Tricolour Hospitals - Born To Serve

DR. PARVINDAR SINGH
Chairman & Managing Director

DR. MAHESH BASARGE
Managing Director

MR. JANAK PATEL
Managing Director

At the very first instance the entire team of Baroda Heart Institute and Research Centre is thankful to all of our well-wishers and friends for their trust, love and support by choosing us as their partner for their health and their dear ones’ health.

Taking this responsibility ahead Baroda Heart Institute and Research Centre is now coming up with its Multi Super Speciality Unit TRICOLOUR HOSPITALS to match the international standards of healthcare delivery providing compassionate quality care that is affordable to all.

Tricolour Hospitals is poised to bring together state-of-the-art infrastructure and latest technology with highly integrated and comprehensive information system, along with a quest for exploring and developing newer standards of care and quality. The hospital is a unique blend of technology and quality in this part of the country as a One-Stop Solution for a wide range of healthcare needs.

www.tricolourhospitals.com
Ensuring a good patient experience comes from raising the standards of quality patient care. At Tricolour Hospitals, the patient’s comfort and speedy recovery is our prime concern. We aim to maintain the highest standards of care by ensuring excellence in everything we do. Each and every member of our staff is committed towards providing care that extends not only to the patient but also to the family. Often it takes more than medical intervention to help a patient; it takes a compassionate approach that comes from creating meaningful doctor-patient relationship.

ENSURING TRUST, CARE & EXCELLENCE

CARE YOU CAN ALWAYS COUNT ON

www.tricolourhospitals.com
WE BELIEVE IN PRACTISING THE FOLLOWING PRINCIPLES TO PROVIDE QUALITY PATIENT CARE:

**RESPECT**  
In all our actions for our patients and their needs

**ETHICS**  
Practising professional ethics at every level

**EXCELLENCE**  
Striving towards excellence in every action

**COMPASSION**  
Ensuring a healing touch with a compassionate approach

Our interventional team is available round-the-clock to help patients with cardiac emergencies with primary and complex Coronary Angioplasties, Stenting, Pacemaker and other Devices. The unit is equipped with latest technologies like FFR and IVUS. Cardiology unit has high-end Electrophysiology Lab for the diagnosis and treatment of conditions like RF ablation for abnormal rhythm.

At Tricolour Hospitals, our aim is to reduce the deadly consequences of cardiovascular diseases through innovative therapies for patient care. Our healthcare professionals bring the promise of unparalleled excellence in patient care, education and research.

**SPECIALISED HEART PROGRAMS**
- Off-pump Coronary Artery Bypass (OPCAB)
- Heart failure surgery - ventricular restoration and ventricular assist devices
- Percutaneous Valve Therapies
- Re-do Operations
- Aneurysm Surgery
- Congenital and Paediatric Heart Surgery
- Aortic Dissection Surgery
- Carotid Endarterectomy
- Peripheral Vascular Procedures
- Atrial Fibrillation & Arrhythmia Surgery
- Mitral & Aortic Valve Repair & Restoration Surgery

**SPECIALISED PROGRAMS - INTERVENTIONAL CARDIOLOGY**
- Angiography/Cardiac Cath
- Angioplasty including Complex Angioplasty including Chronic Total Occlusion
- Percutaneous Valvular Intervention including
  - Balloon Mitral Valvulotomy
  - Aortic Valvulotomy
- Percutaneous Aortic Valve Replacement
- Percutaneous Aortic Aneurysm repair by stent grafts
- Renal Angioplasty & Carotid Angioplasty
- Peripheral Angioplasty including Sub-intimal Angioplasty
- IVC Filter & Pulmonary Embolectomy
- Septal Ablation for HOCM
- Device closure of Congenital Cardiac Defects

**SPECIALISED PROGRAMS - CLINICAL CARDIOLOGY**
- Heart Command: Managing Critically Ill Heart patient
- Non-invasive Diagnostic Cardiology
  - 2D Echo, 3D Echo
  - TMT, Stress Echo
  - Vascular Doppler
- Early Detection of Heart Disease Program
  - Executive Health Check-up
  - Specialised Cardiac Clinics
  - Heart failure Clinic
  - Pacemaker Clinic
  - Hypertension Clinic
  - Community Outreach Program
Department of Neurosciences

Creating Excellence Through Precision

Neurology & Neuro Surgeries

Department of Neurosciences has a dedicated team of doctors supported by the latest technology which will aim to provide a comprehensive and multi-disciplinary care for disorders of brain and spine. Highly qualified neurologists, neurosurgeons, intervention neuroradiologists and other disciplines, will ensure best possible care for the patients. Establishment of dedicated centres for brain tumours, spinal disorders, stroke, epilepsy, movement disorders and headache with involvement of committed multispeciality teams backed by truly world-class technology will ensure successful treatment outcomes. The philosophy of “Patient First” and treatment based on protocols and transparent evaluation of outcomes will ensure appropriate patient management. The Department has facilities for emergency services for the management of acute neurological disorders and surgical emergencies guided with advanced neuroimaging techniques (1.5 Tesla MRI, CT Scan), non-invasive Neurology Lab supported with high-end dedicated ICUs and highly skilled team.

Specialised Surgical Programs

- Brain Tumour Surgery
- Spine Surgery
- Endovascular Neurosurgery
- Interventional Neuroradiology
- Brain Surgery
- Skull Base Surgery
- Deep Brain Stimulation (DBS)
- Epilepsy Surgery
- Nerve and Plexus Surgery
- Movement Disorder Surgery
- Botox Injection

Specialised Centres & Programs

- Neuro-oncology
- Spine
- Stroke
- Epilepsy
- Headache
- Movement Disorder
- Paediatric Neurology & Neurosurgery
- Peripheral Nerve & Neuromuscular Rehabilitation
Tricolour Hospitals’ Department of Orthopaedics is a super-speciality which aims to provide world-class, evidence-based treatment for various orthopaedic disorders and sports injuries. We have a team of highly skilled and dedicated orthopaedic surgeons. We are fully equipped with most advanced cutting-edge technology like computer navigation system, high definition cameras and arthroscopic equipment for performing technically challenging procedures. The Department of Orthopaedics also has modern rehabilitation department with gait analysis lab, hydrotherapy pool, electrotherapy equipment and state-of-the-art gym for rehabilitation. There is a dedicated team of musculo-skeletal anaesthesiologists that provides excellent pre, intra and post-operative care. We at Tricolour Hospitals, also have experienced and dedicated rheumatologists for aging arthritis patients. Our team of doctors is supported by highly experienced physiotherapists and occupational therapists that provide out-patient, in-patient as well as domiciliary care to the patients.

- Paediatric Orthopaedics (Deformity correction, fractures)
- Sports Injuries (Knee ligaments, meniscal transplants, shoulder instability and cuff tears, wrist and ankle injuries)
- Rheumatic Disorders
- Rehabilitation

SPECIALISED CLINICS

- Knee Clinic
- Hip Clinic
- Foot & Ankle Clinic
- Shoulder Clinic
- Hand Clinic
- Sports Injuries Clinic
- Paediatric Orthopaedic Clinic
- Spine & Scoliosis Clinic
- Complex Fracture Clinic
- Pain Clinic
- Gait Analysis Clinic
- Rehabilitation Clinic
Kidney is one of the most important organs that filters and manages waste in our body. Slight discomfort in the kidneys can result in a lot of unrest in the body. Above 30% of critically ill patients develop renal failure of various severities. Therefore, referring it to an experienced nephrologists becomes essential, so as to correctly diagnose and treat the disorder.

The Department of Nephrology is dedicated to providing excellent medical care for patients with acute and chronic renal failure. Providing a comprehensive service for all modalities of renal therapy and dedicated to serving people with kidney disease. Our highly experienced team of doctors can treat and investigate a wide range of kidney disorders including diabetes and hypertension; inherited disorders such as polycystic kidney disease; and end-stage renal disease.

Department of Urology is a unique resource for those with the diseases of the urinary system, including the kidneys, bladder and prostate gland. As the major tertiary care centre, our goal is to deliver the highest-level patient care.

Our department is one of the premier centres in the region using minimally invasive surgical techniques including the state-of-the-art Da Vinci robotic surgery to correct prostate, bladder and kidney problems. The Department will also provide cutting-edge care in all areas of nephrology with round-the-clock delivery of care for dialysis, transplant and chronic kidney disease.

**SPECIALISED CLINICS - NEPHROLOGY**
- Chronic Kidney Disease Clinic
- Hypertension Clinic
- Transplant Clinic – Pre-Transplant & Post-Transplant
- Comprehensive Diabetic Clinic
- Patient Education Programs & Preventive Nephrology
- Interventional Nephrology
- Home Dialysis Program

**SPECIALISED CLINICS - UROLOGY**
- Kidney, Prostate & Bladder Cancer Clinic
- Prostate Health Clinic
- Stone Clinic
- Female Urology & Neuro-urology Clinic
- Sexual Dysfunction & Infertility Clinic
- Paediatric Urology Clinic
Minimal Access/Laparoscopic Surgery is a surgical technique which involves small (keyhole) incisions instead of large cuts. The surgeon introduces a telescope with video camera through this incision into the body cavity and operates by viewing the surgery on a TV monitor.

This approach helps in early recovery of patients as they are usually walking around in a few hours after the surgery and can resume their daily activities in no time. Laparoscopic surgery causes minimal pain and has excellent cosmetic results. The Department of Minimal Access Surgery offers a full spectrum of specialised surgeries – general and minimal access, bariatric surgery and gastrointestinal surgery.

DEPARTMENT OF MINIMAL ACCESS SURGERY

Obesity is a condition where a person’s Body Mass Index or BMI (calculated by dividing height by weight) is more than 30. Obesity can lead to various other diseases like Type 2 Diabetes, High Blood Pressure, Osteoarthritis, Infertility etc. and can be life threatening. It is becoming a global epidemic not only in developed nations but also in developing nations like India. The Department of Bariatric Surgery performs all the different types of weight loss surgeries including revision surgeries with high success rates.

Bariatric surgery or weight loss surgery includes a variety of procedures performed on people who have morbid obesity. Weight loss is achieved by reducing the size of the stomach with a gastric band or through removal of a portion of the stomach (sleeve gastrectomy or biliopancreatic diversion with duodenal switch) or by resecting and re-routing the small intestine to a small stomach pouch (gastric bypass surgery).

DEPARTMENT OF BARIATRIC SURGERY
DEPARTMENT OF GASTRO-MEDICINE & GASTRO-SURGERY

Gastro-intestinal and liver diseases are very common. People face problems like acidity, diarrhoea, gas, indigestion, jaundice, etc. However, if not attended to, these can give rise to serious problems like bleeding from stomach and intestine, severe swelling of pancreas and unconsciousness due to liver failure. The hospital is well-equipped to diagnose and treat such gastro-intestinal diseases.

DEPARTMENT OF DIABETOLOGY & ENDOCRINOLOGY

Life is sweet. But if accompanied by diabetes, it becomes bitter to live with. The Department strives to infuse hope and peace in even the most severe diabetes cases. Diabetes or high blood sugar is not all that fatal by itself. The consequential damages caused to nerves, legs, foot, heart, eyes, kidneys and pancreas is what makes Diabetes actually lethal.

The Department of Diabetes and Endocrinology provides comprehensive in-patient and out-patient services and is run by a highly qualified and experienced team of medical professionals. The Department is equipped to undertake management of diabetes mellitus and thyroid disorders. The Department is also equipped to deal with disorders related to the pituitary, adrenal, para-medical thyroid and reproductive endocrinology, especially complex secondary & tertiary care, adult and adolescent diabetes management, insulin pump therapy, gestational diabetes management and lipid & metabolic disorders.
DEPARTMENT OF PULMONOLOGY

The Pulmonology Department offers bronchoscopy services, both flexible and rigid. It has earned praise for its work in interventional bronchoscopy, especially Trans-Bronchial Needle Aspiration (TBNA)/biopsies, endobronchial electrosurgery procedures, balloon bronchoplasty and stenting. Pleuroscopy and video-assisted thoracoscopic procedures is another field of expertise of the department.

DEPARTMENT OF RHEUMATOLOGY

The Department of Clinical Immunology and Rheumatology was established to provide consultations to patients suffering from arthritis and systemic autoimmune disorders. A wide variety of disorders are addressed which include, Rheumatoid Arthritis, Osteoarthritis other arthritis like crystal arthropathies (gout) etc., backache caused by inflammatory disorders, chronic painful conditions like fibromyalgia, polymyalgia, tendonitis or bursitis, and systemic autoimmune diseases like SLE, myositis, vasculitis etc. which have multi-organ involvement.

Besides the dedicated clinicians, good diagnostic back-up services are available which includes a specialised autoantibody laboratory and high-end diagnostic modalities. Management of patients with these disorders is often purely medical with pain killers/anti-inflammatory medicines, immunosuppressives and immunomodulators. Injections in joints or around ligaments and tendons are also offered using steroids and local anaesthetic agents. If required surgical expertise is available for simple corrective surgeries to complex surgeries like joint replacements. A dedicated team of physiotherapists and occupational therapists are also available for consultations.

We aim to provide an integrated and holistic care to patients with rheumatological disorders for improved outcome and quality of life.
DEPARTMENT OF HAEMATOLOGY

The Department of Haematology has an expert team for diagnosis and treatment of blood diseases. Our haematologists evaluate and treat patients with various conditions such as anaemia, increased or reduced white cells, increased or decreased platelets; enlarged lymph nodes or spleen, bleeding and clotting disorders. The department’s experts also treat blood cancer, including conditions of leukaemia, lymphoma, multiple myeloma and other disorders.

The Haematology Department aims at providing a comprehensive management of all kinds of cancers. Staffed by highly experienced haemato-oncologists, the department is active in prevention and early detection of cancer.

The hospital has specially designed high-end Bone Marrow Transplant unit for all haematological disorders requiring Stem Cell or Bone Marrow Treatment.

DEPARTMENT OF DENTISTRY

Research reveals that more than 70% of the population is suffering from dental caries and more than 85% from pyorrhoea. Our skilled team at the Department of Dentistry and Maxillo-facial Surgery includes paediatric dentists, orthodontists, endodontics, oral and maxillofacial surgery, prosthodontics and periodontics. The department has been catering to the dental needs of its patients since its inception. Our services are rendered to children, teens, adults and even patients with special health care needs.
DEPARTMENT OF ONCOLOGY

The Department of Oncology provides state-of-the-art services in the management of cancer through medical oncology and onco-surgery. We offer diagnosis and treatment for the entire gamut of solid tumours and haematological malignancies affecting both adults and children.

MEDICAL ONCOLOGY

The Department of Medical Oncology uses chemotherapy and allied drugs and other targeted therapy for management of cancer from diagnosis to treatment. Our team of highly experienced medical oncologists works with multi-disciplinary teams from a range of supportive care departments, including the Department of Mental & Behavioural Sciences, Clinical Nutrition, Palliative Care and Physiotherapy.

SURGICAL ONCOLOGY

Our team of highly experienced medical oncologists works with multi-disciplinary teams with a range of supportive care departments, including the Department of Mental Management of Cancer from diagnosis to treatment.

DEPARTMENT OF OPHTHALMOLOGY

The Ophthalmology Department has the expertise to treat all kind of eye related problems ranging from routine eye examination to other conditions of the eye and surrounding structures. Our team of ophthalmologists is fully equipped with state-of-the-art diagnostic and therapeutic equipment for treating glaucoma, cataract, corneal and external diseases, aesthetics, paediatric ophthalmic diseases and disorders.
DEPARTMENT OF RADIOLOGY

The Department of Radiology provides a full range of radiological services related to MRI, CT, Ultrasound, Fluoroscopy, Mammography, DEXA, X-Rays and Intervention procedures. We have installed technologically advanced, state-of-the-art medical equipment in our endeavour to provide the best diagnostic output. The department consists of highly skilled technicians and radiologists who are dedicated to provide 24X7 patient care. The department is also actively involved in pushing boundaries in the world of radiology and imaging through various research activities.

DEPARTMENT OF ENT

ENT problems like ear ache, common cold, epistaxis, sore throat, etc. are very common. Over the years, the field has developed to a great extent and today more and more surgeries are performed by microscope and endoscope.

The ENT Department consists a highly-experienced team of surgeons to provide the best cures for such problems. It is well-equipped to handle emergencies with a 24-hour emergency backup and a full time ENT surgeon. The hospital boasts of highly skilled team of doctors who use latest technologies to perform endoscopic nasal surgeries, skull base surgeries, ear and cochlear implant. Treatment of ear, nose and throat conditions in adults and children, along with problems in hearing and deafness, ringing in the ears, cancers of the ENT are treated.
DEPARTMENT OF TRAUMA & CRITICAL CARE

Dealing with trauma requires skill, speed and teamwork. A synchronisation of these three elements can save many lives. At Tricolour, we not only recognise this critical aspect but are also fully-equipped with a dynamic polytrauma team to handle such critical situations. Our multi-disciplinary speciality approach is a unique attempt in reducing mortality and morbidity rates in polytrauma patients.

At Tricolour Hospitals, we have a dedicated team of critical care specialists to take care of our patients.

We have 52 bedded fully equipped critical care units of various specialities. They include MICU, SICU, ICCU etc. Our intensive care units are of international standards, with ultra-modern facilities and infrastructure.

DEPARTMENT OF PATHOLOGY

Tricolour Hospitals is supported by very well-equipped, in-house lab, where tests are done on clinical specimens. If needed, you can also get information about the health of a patient based on diagnosis, treatment, and prevention of disease. We have a fully automated computerised pathology laboratory that maintains high quality standards.
REHABILITATION SERVICES

We take care of our patients, even after they have been discharged from our hospital. We conduct regular rehabilitation programs, in which discharged patients are able to work on getting back to normal lifestyle.

DEPARTMENT OF PREVENTIVE HEALTH CHECK-UP

Health check-ups not only assess your present health status, but also screen you for any risk factors and thus, help you take necessary steps in prevention or early detection of any major illness. Health check-up packages include clinical assessment, along with a complimentary nutritious breakfast followed by comprehensive advice related to your health status during follow-up visit.
COMMUNITY OUTREACH CENTRES

Our team works with internal and external partners to provide health initiatives, education, and resources tailored as per the need of the community across various centres. A well-informed society is instrumental in controlling the spread of contagious diseases.

With wellness programs, educational health talks and support groups, chronic disease management services, health assessments, and clinical screenings, we reach out to the people in diverse ways. We believe with better awareness, there is a better chance of avoiding diseases or recognising it early.

ONE OF THE GREATEST GIFTS YOU CAN GIVE IS YOUR TIME
WELCOMING A WORLD OF GOOD HEALTH

Tricolour Hospitals is specially geared to welcome international patients. We offer the highest standards in cutting-edge technology led by a dedicated team of doctors drawn from all over the world. We ensure a completely sanitised environment and personalised care. We have brought together an outstanding pool of doctors, to collaborate for multi-disciplinary solutions. This translates to faster methods of diagnosis and treatment.

Our International Patient Services will organise your treatment packages, visa assistance, airport pick-up, hotel reservations and any sightseeing trips you may want to add after your recovery. These services include coordinating and scheduling of appointments, medical care & advice and ensuring your comfort and well-being.

OUR INTERNATIONAL PATIENT SERVICES INCLUDE:
